REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Ellingson shows a method for depth-resolved detection of subsurface microstructure including means for producing a first illumination (figure 1 Ref 12), a means for measuring light intensity (figure 1 Ref 36), a means for allowing the position of the sample to change (figure 1 Ref 18), a means for producing a second illumination (column 5 lines 5-27), a means for measuring the second light intensity (figure 1 Ref 36), a means for comparing the emanating light (column 6 and 7), a stage that is movable and orientable in one or more directions (figure 1 Ref 18), a means to deflect initial beam towards a spot on a sample (figure 1 Ref 20), and a means to select light emanating from said illumination (figure 1 Ref 20). However Ellingson does not disclose a first diffraction limited focal point and a second diffraction limited focal point. Ellingson teaches shining the light at the surface of the sample and receiving the reflections from only the surface and not a focal point within the sample.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luke D. Ratcliffe whose telephone number is 571-272-3110. The examiner can normally be reached on 8:00-4:30 M-F.
